

PIGOR[®] 730

Butter-Vanilla type

Flavouring for piglet feeds

Code	6730		
Description	Flavouring premixture. Enhances the smell and the taste of the feeds and imparts to them an attractive and persistent aroma of butter and vanilla.		
Appearance	Free flowing whitish to pale pink powder, dustfree.		
Composition	Nature-identical flavouring substances.		
Physical properties	Bulk density	:	0.85 - 0.99 g/cm ³
	Granulation	:	100 - 500 microns
Legislation	In conformity with European and American feed legislation. Free from GMO and animal products. In conformity with the directive (2002/32/CE) and its modifications (2003/57/CE and 2003/100/CE) concerning heavy metals and dioxin content. Contains: Propylene glycol E 490 (24.3 g/Kg)		
Stability	Maximum 18 months when stored in original packaging and kept in a cool dry place. Variations in colour are independent of its aromatic properties.		
Use and benefits	Piglet feeds. PIGOR [®] 730, confers to the feeds an attractive and persistent flavour of butter and vanilla and improves their palatability. It ensures a regular consumption when variation of raw materials quality or change in formulation occur. PIGOR [®] 730, covers the off odour of some raw materials and corrects their sensory variations. The attractive and persistent butter-vanilla smell emitted by the feed adds a marketing impact to the manufacturer and is highly appreciated by the farmer. In combination with SUCRAM [®] the palatability is optimised.		
Application method	Mixing into feed.		
Packaging	25 kg multi-layered paper and plastic bags. PA/EVOH/PE plastic bags, recycling category 07.		
Application rates	Complete feed for piglets:	Prestarter Starter Early grower	150 - 200 g/t 100 - 120 g/t 60 - 100 g/t
	Please note that application rates quoted above are very much dependent upon the raw materials used in the feed formulation. For specific recommendations on the products intended to be used, please contact the local Pancosma representative for further information.
